

**HIGH VOLUME AIR SAMPLER AIR MONITORING RESULTS  
SUMMARY  
MAY 30, 2009**

<b>Sample Date</b>	<b>Location</b>	<b>Total Lead (ug/m<sup>3</sup>)</b>
5/30/09	1	0.015
5/30/09	2	0.048
5/30/09	3	0.019
5/30/09	4	0.005
5/30/09	6	0.006
5/30/09	7	0.007

On October 15, 2008, the United States Environmental Protection Agency (USEPA) lowered the National Ambient Air Quality Lead Standard from a quarterly average of 1.5 µg/m<sup>3</sup> to a rolling three-month average of 0.15 µg/m<sup>3</sup>, effective October 2009. The method of collecting the samples did not change. All results are below the current standard for the Site of 1.5 ug/m<sup>3</sup> and below the revised NAAQS standard of 0.15 ug/m<sup>3</sup>.
