

**HIGH VOLUME AIR SAMPLER AIR MONITORING RESULTS  
SUMMARY  
JUNE 23, 2009**

| <b>Sample Date</b> | <b>Location</b> | <b>Total Lead (ug/m<sup>3</sup>)</b> |
|--------------------|-----------------|--------------------------------------|
| 6/23/09            | 1               | 0.020                                |
| 6/23/09            | 2               | 0.007                                |
| 6/23/09            | 3               | 0.020                                |
| 6/23/09            | 4               | 0.003                                |
| 6/23/09            | 6               | 0.002                                |
| 6/23/09            | 7               | 0.003                                |

On October 15, 2008, the United States Environmental Protection Agency (USEPA) lowered the National Ambient Air Quality Lead Standard from a quarterly average of 1.5 µg/m<sup>3</sup> to a rolling three-month average of 0.15 µg/m<sup>3</sup>, effective October 2009. The method of collecting the samples did not change. All results are below the current standard for the Site of 1.5 ug/m<sup>3</sup> and below the revised NAAQS standard of 0.15 ug/m<sup>3</sup>.
