

Co-Located Lead Sample Result for Non-Working Hours

Week of May 25, 2009

On October 15, 2008, the United States Environmental Protection Agency (USEPA) lowered the National Ambient Air Quality Lead Standard from a quarterly average of 1.5 µg/m³ to a rolling three-month average of 0.15 µg/m³, effective October 2009. The method of collecting the samples did not change. All results are below the current standard for the Site of 1.5 ug/m³ and below the revised NAAQS standard of 0.15 ug/m³.

| Date | Sample ID | Sample Location | Result ug/m ³ | Co-located with |
|---------|----------------|--|--------------------------|-----------------|
| 5/26/09 | 052609-NWH-AM3 | West of Area B; down wind of excavation Areas B and C. | <0.048 | Air Monitor #3 |
| 5/27/09 | 052709-NWH-AM2 | South of the Containment Area, upwind of the Site. | <0.033 | Air Monitor #2 |
| 5/27/09 | 052709-NWH-AM3 | South of the southwest North Woods; down wind of excavation Area B. | <0.035 | Air Monitor #3 |
| 5/27/09 | 052709-NWH-AM4 | North of the Containment Area, down wind of Containment Area material. | <0.048 | Air Monitor #4 |
